Dagestan State Medical University

2026

Est. 1932

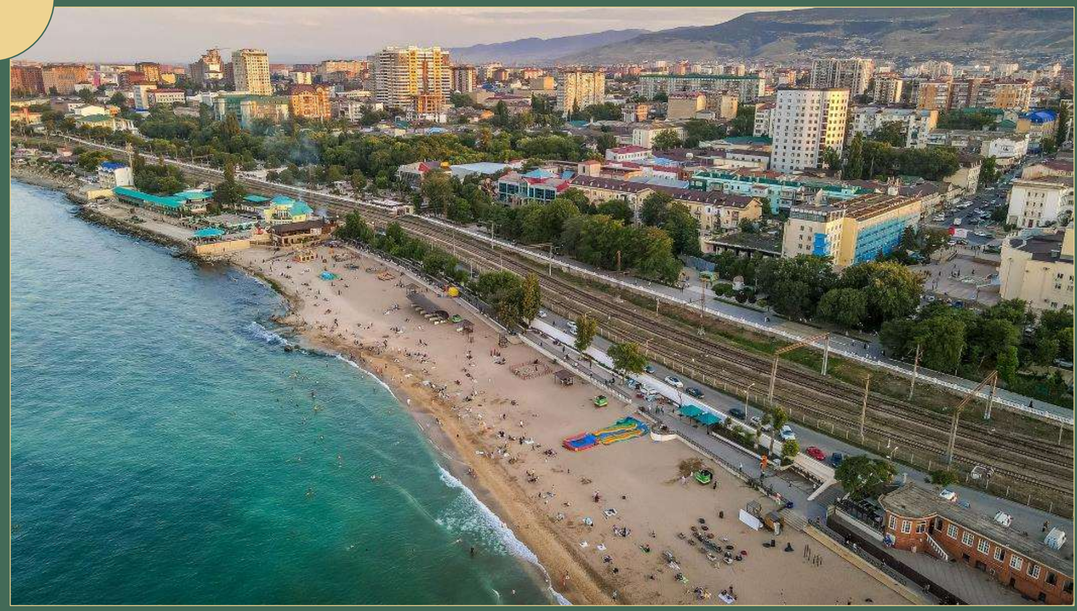

Dagestan is situated in the southernmost part of Russia

Republic of Dagestan

Dagestan is a republic located in the North Caucasus region of Russia, on the western shore of the Caspian Sea. It is known for its rich history, diverse ethnic groups, mountain landscapes, and strong cultural traditions. The capital city is Makhachkala.

Republic of Dagestan

The republic is home to representatives of over **30** indigenous nationalities, more than **110** nations and ethnic groups, each with their own languages and dialects, culture, and rich traditions.

Makhachkala city

The religious composition of Dagestan's population is linked to the republic's ethnic diversity. Most of the residents practice Islam. There are also Christians and Jews living in Dagestan.
The republic has a law that guarantees freedom of conscience, freedom of religion, equality of religious organization and prohibition of inciting interfaith enmity.

Dagestan is distinguished by its religious and cultural diversity, and the traditions of different peoples have coexisted peacefully for many centuries.

Dagestan State Medical University

Russia has the best medical colleges and universities in the world. Dagestan State Medical University (DSMU) is one of the leading medical universities of Russia, where every year students from many countries come to study MBBS and for other specialties.

DSMU is listed in the World Directory of Medical Schools (WFME/FAIMER), which gives its graduates the opportunity to get a job in any country in the world after passing the national exam.

DSMU today:

- One of the oldest medical universities in Russia
- 6000+ undergraduates, residents, postgraduates
- 75 departments
- 5 faculties
- 1000+ alumni annually

Rector of DSMU

University infrastructure

Anatomical Museum

The Anatomy Museum is a platform for those who are taking their first steps in medicine and pharmacy, as mastering this basic specialty affects their professional competencies. Museum objects are available during students' training. Modern 3D technologies are used for visualizing materials.

Nanomedicine Laboratory

The Laboratory of Fundamental Nanomedicine is equipped with modern equipment, the key element of which is the atomic layer deposition reactor (ALD). Applied research on biocompatible materials for application in various areas of medicine is conducted within the laboratory.

Sports complex

"The preparation of medical students, future doctors, should go through modern sports complexes, modern equipment. And students, by their personal example, promoting a healthy lifestyle, will contribute to the primary and secondary prevention of many diseases," - Rector of DSMU.

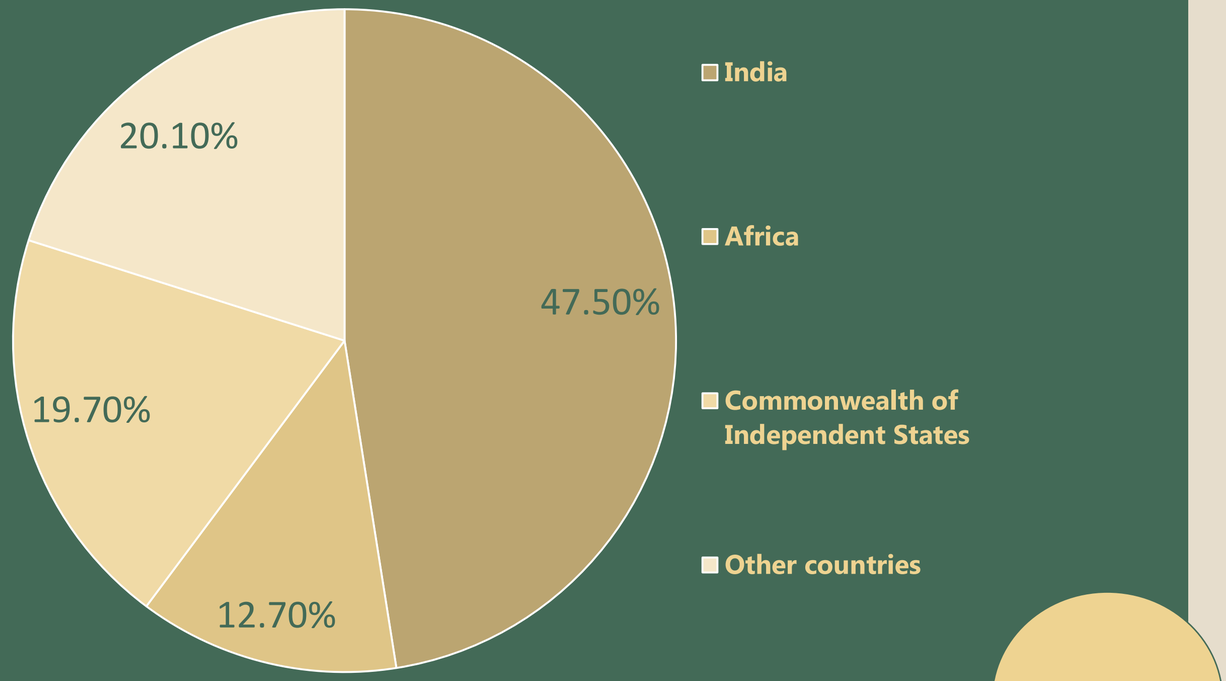

Innovation center

The Scientific and Educational Innovation Center combines educational technologies within the framework of a simulation accreditation center and scientific technologies within the Center for Collective Use. Here, students will be able to develop knowledge, skills, and abilities in simulated conditions.

Students of DSMU

An integral part of the friendly student family of the university are foreign students who come from a number of foreign countries and study in the specialties "General Medicine", "Pediatrics", "Dentistry", "Medical and Preventive Care" and "Pharmacy". Students also study at the College of Medicine at the university.

Currently, foreign students from 40 countries - Azerbaijan, Afghanistan, Ghana, Egypt, Zimbabwe, Zambia, India, Jordan, Yemen, Kazakhstan, Nigeria, Pakistan, Palestine, Syria, Turkey, Uzbekistan, etc. study at the university.

Dormitories for foreign students

DSMU provides students with two comfortable dormitories. They are located in the central part of the city, in close proximity to lecture halls and bus stops serving any part of the city. Each dormitory has blocks of rooms. Each block contains four rooms, designed for 1–3 people, as well as a kitchen, a bathroom, and a toilet. The rooms are already furnished with everything students need: a bed, bed linen, a bedside table, a wardrobe, a desk and chair, a bookshelf, and curtains etc. Internet and Wi-Fi are not a problem: our dormitories have a high-speed network. On the ground floor, there is a laundry room where students can wash bed linen. For relaxation and sports, we have an outdoor gym and a sports ground for basketball and volleyball. On the ground floor of the dormitory, you can play table tennis. The dormitory is guarded around the clock.

University’s scientific life

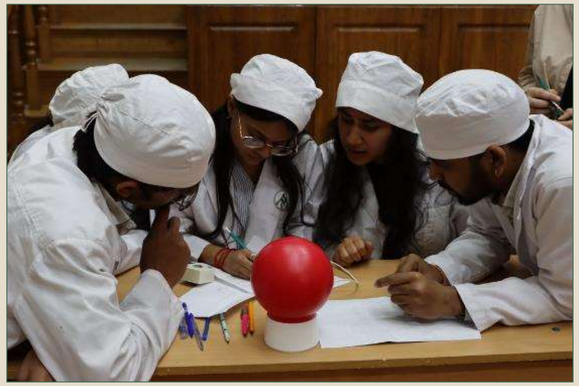

Foreign students actively participate in the university’s scientific life. They take part in conferences, research projects, seminars, olympiads, and academic competitions. This helps them develop their skills, exchange knowledge with other students and teachers, and become more involved in the university’s scientific community.

Foreign students also have the opportunity to celebrate their national and cultural holidays here. At the beginning of the academic year, the university organizes a welcoming concert to help them adapt, feel comfortable, and get acquainted with university traditions and other students.

ВО ДГМУ
ава России

The Rector and administration of the university regularly hold meetings with international students to recognize their achievements, congratulate them on their success, and support their academic and personal development. These meetings also help strengthen communication between the university administration and foreign students, making them feel valued and included in university life.

Application dates and deadlines may vary slightly from year to year. Applications for the 2026–2027 academic year opened on July 1, 2026.

Admission requirements for the General Medicine Faculty (English Medium)

The admission process for international applicants generally consists of the following stages:

Submission of the Application: the applicant completes the online application form and submits it together with the required documents, including a valid passport, secondary school certificate and academic transcripts.

Application and Document Review: the university's International Department checks the application and verifies whether the submitted documents meet the admission requirements. If any information or documents are missing, the applicant may be contacted and asked to provide additional materials.

Issuance of Admission Documents: after the required procedures have been completed, the university issues the official admission letter and the visa application form for international students.

Visa Application: the applicant uses the Invitation issued by the university to apply for the appropriate student visa at the embassy or consulate in their country of residence. The process of obtaining an invitation letter takes approximately 1–3 days for applicants from India and about one month for applicants from other countries.

Arrival and Registration: after obtaining the visa, the student travels to the university within the designated period and completes the registration procedure. Upon arrival, the student submits the original documents, undergoes any required medical examination and completes accommodation arrangements.

Entrance Examinations: the applicant takes an entrance examinations. The university informs the applicant in advance about the format, date, and requirements of the examinations.

Admission Decision: after reviewing the results of the examinations, the university makes an admission decision. Successful applicants receive the admission notice.

Payment of Fees: the applicant pays the required tuition fee, accommodation fee, and any other applicable charges within the deadlines specified by the university.

Commencement of Studies: once registration is completed, the student receives information about the academic calendar, timetable, faculty, accommodation, and other important matters and begins their studies at the university.

Thank you for your attention.
