BACHELOR FIRST.

Dental Science for a wider future

3 YEARS | 180 ECTS | MQF 6

EIMS • Malta • English-taught • Face-to-face

BSc (Hons) in Dental Science

A complete non-clinical Bachelor degree connecting dental science, biomedical science, research, digital health and bioengineering concepts.

Recruiter Webinar • 15 October 2026

European Institute for Medical Studies (EIMS) H.E.I.

The message recruiters should remember

One qualification. Multiple future directions.

1 COMPLETE BACHELOR

3 years
180 ECTS
MQF / EQF Level 6
English-taught
Face-to-face in Malta

2 INTERDISCIPLINARY

Dental Sciences
Biomedical Sciences
Research & evidence
Digital health
Bioengineering concepts

3 PROGRESSION

Compatible Master's / postgraduate study
Research
Health technology
Bioengineering-related pathways
Dentistry-related progression via admission / RPL

BACHELOR FIRST → then specialise

What students actually study

Dental science is the core — but the academic profile is broader.

Dental & Oral Sciences

Dental materials • oral sciences • patient-centred and evidence-based concepts

Biomedical Foundations

Anatomy & physiology • biochemistry • microbiology • cellular / biological sciences

Research & Evidence

Research methodology • scientific writing • critical appraisal • evidence-based reasoning

Technology & Data

Health informatics • data analysis • digital dentistry • VR/AR learning environments

Bioengineering Concepts

Biophysics • medical technology • biomaterials • interdisciplinary healthcare innovation

Advanced Year 3

Oral medicine • pharmacology • research project / dissertation • biomedical data analysis

What the BScDS is — and is not

Clear positioning avoids misleading students and families.

IT IS

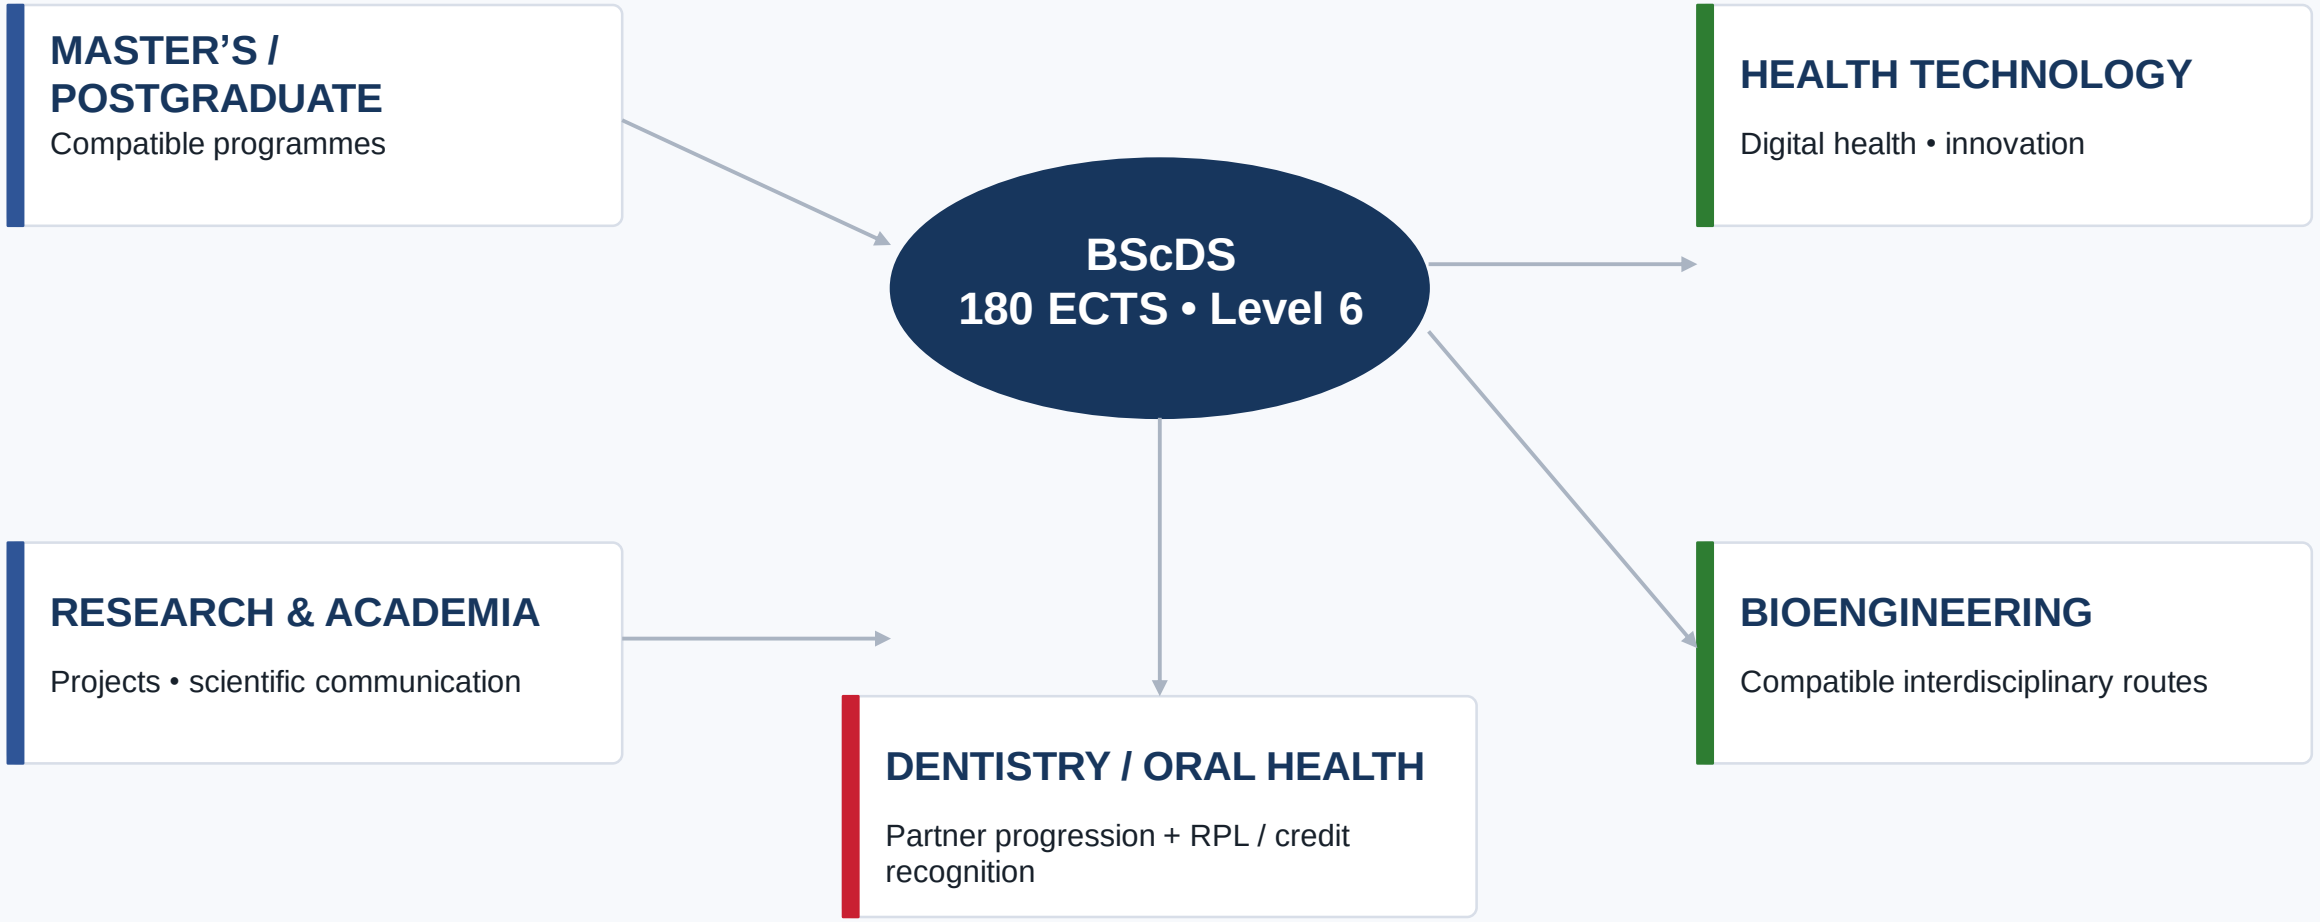

✓ A complete academic Bachelor degree
✓ 180 ECTS / MQF-EQF Level 6
✓ Non-clinical dental science education
✓ Interdisciplinary science + technology + research
✓ A platform for compatible postgraduate and progression opportunities

IT IS NOT

✗ A Dental Assistant course
✗ A 3-year Dentistry qualification
✗ A licence to practise as a dentist
✗ Guaranteed entry into a specific year of Dentistry
✗ Automatic admission or automatic credit transfer to a partner university

After graduation: several compatible directions

The Bachelor creates a first academic platform; the next step depends on the student's goal.

Receiving institutions determine admission, RPL, credit recognition and professional requirements.

International academic collaboration

A growing interdisciplinary ecosystem around the BScDS.

EIMS × COLORADO STATE UNIVERSITY

Signed academic collaboration agreement

WHY IT MATTERS

Supports academic dialogue around interdisciplinary progression, research and bioengineering-related opportunities.

HOW TO PRESENT IT

A formal academic collaboration that strengthens the programme’s international and interdisciplinary direction.

WHAT NOT TO PROMISE

No automatic CSU admission. No guaranteed credit transfer unless a specific pathway formally confirms it.

Partnerships expand opportunity — they do not replace the receiving institution’s admission rules.

Who is the right student?

Recruit for fit — not only for the word “dentistry”.

STRONG FIT

- Interested in dental / oral sciences
- Curious about biomedical science
- Open to research and evidence-based thinking
- Interested in technology, digital health or bioengineering
- Wants a complete European Bachelor before specialising
- Values multiple future academic directions

NEEDS CLARIFICATION

- Expects to qualify as a dentist in 3 years
- Wants a guaranteed advanced Dentistry year
- Wants only clinical chairside training
- Expects automatic partner-university admission
- Assumes visa approval is guaranteed

Best recruiter question: **“Are you interested only in becoming a dentist — or also in dental science, biomedical innovation, research and technology?”**

International applicants: start early

Academic admission and Malta Study D-Visa are related — but separate processes.

1 SCREEN

Check academic entry + English

2 APPLY

Submit complete academic documents

3 ADMISSION

EIMS reviews and issues institutional documents

4 VISA

Follow current Malta / Identità Study D-Visa procedure

5 ARRIVAL

Travel only after required permissions

For February intake planning, recruiters should send realistic candidate updates early. EIMS supports admitted students with institutional documentation; visa decisions and processing remain with the competent Maltese authorities.

Hear it from our students

A first-hand perspective after Year 1 at EIMS.

“The EIMS BSc in Dental Science: A Student Editorial on Innovation, Curriculum, and Future Directions”

Written by EIMS students after completing their first year

Use this with prospective students and families who want to understand the programme beyond marketing language.

The EIMS proposition in one line

3 YEARS IN MALTA → **COMPLETE BACHELOR** → **MULTIPLE DIRECTIONS**

Dental Science + Biomedical Science + Research + Digital Health + Bioengineering Concepts

Not a shortcut to a dental licence. A broader academic starting point for the future of oral health and healthcare innovation.
